

Bulk Packaging

The Quest Ends Here.

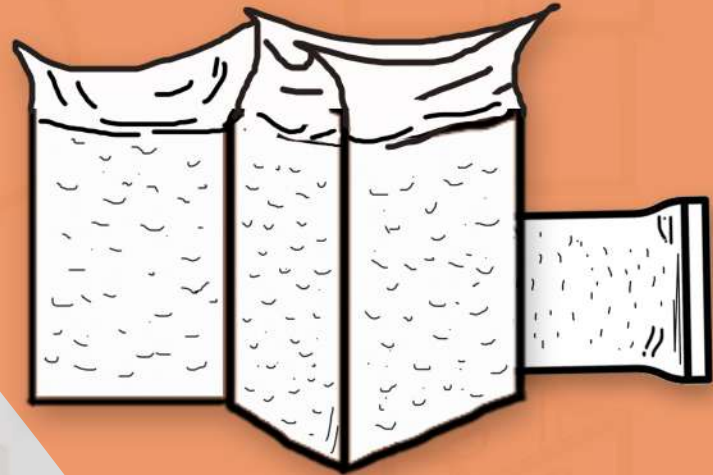

Being one of the most experienced players in Packaging; *"What is special about you?"*, *"What is unique about you?"*, is a question we face every now and then directly or indirectly.

It is not easy to find quick answers to all such queries. However, many of our achievements or specialties may be highlighted.

"The very company that brought the packing machine to the commoner and industry in India",
"The company that saved the sealing from the candles",
"Our services available from Kanyakumari to Kashmir etc."

But today, we wish to discuss none of these capabilities here. This is an attempt to highlight our strength in bulk packaging equipment or to explain what products in offer for bulk / bigger bag packing, how we can support you in bulk packaging.

Unlike the retail/consumer packaging machines/equipment; which is dominating the packaging industry, bulk packaging is a specialized area and usually supporting to B2B businesses. It is more of functional rather to aesthetic. Such requirements are varied v/s industries like food, pharma, chemical, and industrial products. Varied in filling, closing/sealing, MAP, secondary packaging machines etc. We have the whole range of machines to offer in bulk packing.

Bulk Bagging/Bag Filling

Bulk filling / bagging machines are available for the range from 10 kgs – 75 kgs. Our patented technology in this offers the most compact design available in the market. This brings in many practical advantages like saving on your capital investment, better adaptability to an existing system in place, ease of doing etc.

Gravity feed, Vibrator feed, and Screw feed systems are available to suit specific product requirement.

Pneumatic Sealer

Operator fatigue is an important factor when considering the quality of the sealing, this dilation is bound to happen and this could very well make improper results. Pneumatically operated sealers are an answer to this problem and produce consistent results and throughout. Pneumatic sealers are available in lengths 650 mm & 900 mm

Vacuum Packaging / MAP Machines

Vacuum packaging / Modified Atmosphere Packaging (MAP) is the safest, most time-tested, reliable packaging method practiced for very long. SEPACK being one of the companies that brought vacuum packaging in India offers a wide range in Bulk packaging as well. In fact, vacuum packaging of bulk products / products is best justified in terms of the economy when considering consumer vacuum packaging.

Vertical Chamber Type Vacuum Packaging Machines

It is ideal for producing high vacuum packs in the range of 5 – 50 kgs bags. Generally, two variants are available for packs up to 25 kgs and for up to 50 kgs (depending on bulk density). An optional gas filling system is available for upto 2 gases. Vertical vacuum packaging machines are widely used in packaging of Nuts, Tea, Spices, Pulses, Nutraceutical powders etc.
